

AIR COLUMN BAG

Product Description

Stream Peak's Air Column Bags serve as a durable, firm protection layer to fragile goods during shipping. During shipping, goods may slip, shift and move in its packaging box when not properly secured which may lead to damage from impact when it hits the surface of its packaging. Especially for heavy and fragile goods, this may cause severe damage or workplace accidents. Thus, shipping professionals take precautionary measures to secure goods in place during shipment using void fillers such as air pillows and paper fillings.

However, for heavy and fragile goods which are usually high in cost, extra protection is required to ensure maximum protection and minimum damage risks. Thus, Air Bags are commonly used to provide cushioning to these goods.

Stream Peak offers a variety of Air Bags for different goods of different shapes and sizes. We offer Air Column Bags, also known as Air Cushion, Bubble Column Bag, Buffering Air Packaging or Cylindrical Inflatable Bag.

Air Column Bags are commonly used to protect a variety of goods such as; Glasses, Circuit Boards, Books, Liquid items, Handbags, Suitcases, Bags, Electronics, Cosmetics, Precision Instruments, Ceramics, Hardware, Fruits, Flowers, Furniture, Domestic Appliances, Arts, and other fragile items. It is commonly used to secure and protect these fragile goods due to its shock-proof and durable nature. Filled with air, Air Column Bags have a strong and firm exterior, providing goods maximum protection from impact.
