

AUTO BAG 575B AUTOMATIC BAGGER

Product Description

The Auto Bag 575B Automatic Bagger is a semi-automatic bag filling and sealing machine. Electrically operated and activated by a footswitch that will automatically move the next bag along to the fill position, this device enables a speedy and simple bag packaging process. This machine is also able to process poly, food-grade and anti-static ready-made bags on a roll-up to 15 times per minute, increasing product value and efficiency.

Operated for both left and right-hand access to the HMI, cycle switch, roll and ribbon loading, this auto bagger includes servo-driven web controls and excellent job storage capabilities that add value to the whole process while eliminating waste, providing a consistent integration into any operation. The system can be networked for full pack station integration when using central monitoring, and productivity data can be obtained for analysis.

Additionally, the 575B auto bagger includes an advanced thermal transfer imprinter for next-bag-out printing and is suitable for applications that frequently need product and label changeovers. The thermal transfer is achieved when positioned directly over the next bag to be loaded.

Made in the USA, the 575b bagger has a warranty of 1 year, which is extendable up to 5 years only if using Rollbag brand bags on a roll or poly tubing.

Industries Served

- Automotive
- Cosmetics
- Electronics
- Healthcare
- Logistics
- Shipping

Product Features

- Precise bag length control adjustment
- Fast bag repositioning control (forward or reverse) for ease of set up and use
- Front roll access for easy roll mounting and threading
- Adjustable sealing/dwell controls provide precisely timed, high quality seals
- Electric foot switch for fast, efficient operation
- Portable, compact tabletop design

Options

• Adjustable Funnel with Preparation Table

Stainless Steel table mounted above the machine that allows for sorting, storing and kitting of product before manually pushing the product into the adjustable funnel which guides the product into the bag.

• Multi-Rolls

This option allows you to have multiple bag sizes pre-loaded onto a bag shaft ready to set up and run the machine.

• Spare Parts Kit

Additional wear items include Teflon, seal wire and fuses.

• Cycle Counter

Each time the foot pedal is pressed it will count as one cycle

• Longer Bag Length

Up to 36" bag length

• 220 Volt Operation

• Console Stand

Place your bagger on a stand instead of a table. The stand has the option for casters in order to easily move the bagger around your production facility.

Product Specifications

Technical Specifications	
Production Capacity	Up to 15 bags/min
Minimum Bag Size	2" x 2"
Maximum Bag Size	12" x 12"
Seal Width	12"
Electrical Requirement	120V, 4A
Dimensions (W x D x H)	18" x 10" x 24"
Shipping Weight	75 lbs
