

# AUTOMATIC BANDING MACHINES

## Product Description

Using an automatic banding machine increases the efficiency of the bundling/strapping process for your company. It also reduces material and labour costs while ensuring that your product is safe and secure during transportation.

The strapping band is applied horizontally or vertically around the product, with the ends of the strapping material coming together. The banding machine then connects these ends after the correct tension has been applied and closes the strapping band using a seal or buckle. After this, the excess strapping band is cut automatically. All materials, sizes and shapes can be strapped.

Banding machines are efficient and effective for strapping merchandises, food and printing industries.

### Uses of banding machines:

Paper bands can be removed without using a cutting tool.

Transparent plastic bands showcase your product.

Labels can be eliminated by printing directly on the band.

The banding will not damage the corners and edges of your product.

A diverse selection of banding materials and machine options.

## Industries Served

- Electronics
- Healthcare
- Logistics
- Printing
- Cosmetics
- Shipping

## Tabletop Paper Banding Machine

This tabletop paper banding machine is handy, mobile and immediately ready for operation. Featuring a short table for small formats, it is extremely user-friendly and requires low maintenance. The control panel allows the user to switch between modes – Auto, Manual & Pedal. Streampeak's tabletop paper banding machine is also versatile as it is compatible with a variety of product sizes.

## High Table Banding Machine

The high table banding machine enables comfortable working conditions with its height and brake rolls. The machine provides a convenient roll changing feature that enhances user-friendliness. The control panel allows the user to switch between modes – Auto, Manual & Pedal. Streampeak's high table banding machine is also versatile as it is compatible with a variety of product sizes.

## Product Specifications

Technical Specifications		
	Tabletop Banding Machine	Automatic Banding Machine
Tape material	W 29.44mm x TH 0.1 mm x L190mm	W 29.44mm x TH 0.1 mm x L 500mm
Tape specification	Paper/OPP Film	
Strapping speed	≤ 3 seconds	
Tension	5 – 40N	
Package dimensions	Max: 460 x 200, Min: 30 x 10	
Machine dimensions (L x W x H)	630 x 364 x 474	630 x 364 x 1239
Power supply	220V 50 Hz/60 Hz; 110V 60 Hz	
Electrical power	80W	
Net weight	32.5 kg	74.5 kg
