

# TENSIONERS

## Product Description

Our tensioners contain advanced German engineering and knowledge where we product electric, pneumatic and manual tensioners and ratchets, all to the highest quality standards.

Our special designed bracket shoe is made to fit all our strapping systems. Some models come with a integrated stainless steel cutter which will easily cut any strapping or lashing belt.

## Battery Operated Tensioner

### ELT-35 for woven and composite strapping

This electric battery powered strapping tensioner for belts up to 32mm width, offers function and design that are outstanding and revolutionary. Instead of using a standard power tool, somehow attached to a gearbox, we have designed this tool from scratch, focusing on the application.

And the results are astonishing. A very strong motor and the newest generation of rechargeable batteries have proven their reliability in many tests.

## Key Features

- Newest lithium ion battery technology
- Min. 600 up to 1000 pulls per charge
- Fully charged in 1 hour
- External power supply included
- Heavy duty durable and ergonomic design
- Pulling force up to 850 KG/F
- Wind and rewind function
- Integrated belt cutter.

## Industries Served

- Logistics
- Engineering and Machinery
- Power and Refinery

### **Leverage Tensioner**

It is also called the pry bar tool and it is designed for manual tensioning of strapping belts up to 25mm width. This tool comes very handy especially when it comes to tensioning round bundles.

### **Pneumatic Strapping Tensioner**

This pneumatic tensioner can be used for woven polyester strapping and for composite strapping belts from 9-32 mm width. The strong, bi-directional pneumatic motor pulls up to 800 KG/F. The strapping cutter knife is included in the tool, the blade is made fro special hardened steel.

### **Tensioner S-25, S-35 and S-50**

The market of tensioner is already overflown with cheap models made in China. Our tensioner are made in China too, but it contains advanced German engineering and knowledge. While most of the cheap models are based on a ratchet system, our tensioner is equipped with two anti cycling one-way bearings.

These bearings make the tensioner more durable and easy to handle, as less force is needed during the tensioning. The special designed bracket show is made for all our strapping systems. High quality composite will be protected. The integrated stainless steel cutter will easily cut any belt.

### **Ratchet R 50 XXL Tensioner**

Heavy-duty challenges needs heavy-duty tools. The R 50 XXL Ratchet can be used for any kind of strapping system of 25 to 50 mm width. The design of these big tools is made to be as light weighted as possible and the wide tension angle gives you maximum tensioning strength at minmum force.

## Universal Bracket for Ratchets Tensioner

Combine any standard ratchet with our, in house manufactured universal belt bracket, to a very powerful tension tool.

The inexpensive ratchet can easily be changed when defective or worn out. The belt clamp of the bracket is extremely durable. Here we have created an inexpensive but valuable combo.

### Key Features

- Economic solution
- Bracket extremely durable
- Bracket fits to many standard ratchets
- Fast and easy to change the ratchet

## Product Specifications

Tensioner S-25, S-35 and S-50

Technical Specifications		
Item	One-way bearing	Belt Width
S-25	Yes	Up to 25 mm
S-35	Yes	Up to 32 mm
S-35 A	Yes / Alu body	Up to 32 mm
S-50	Yes	Up to 50 mm

## Universal Bracket for Ratchets

Technical Specifications
Item
B-50 Tensioner, flexible ratchet bracket with ratchet
Replacement Ratchet for B-50 (without bracket)
B-55 Tensioner, bracket with ratchet "PUSH" system
